Two-Three Hour Lecture/Demo Seminar

Number of Students:

Since this is not a hands-on seminar, the number of students depends on the availability of seating space, a large enough screen for everyone to see, and an adequate sound system for everyone to hear.

Description:

In this slide lecture and demonstration, Caryl shares her secrets for managing the quilt sandwich, and controlling the stitches, as well as her techniques for developing designs. She will also share slides of the work of several other successful machine quilters. This is a chance to get your questions about machine quilting answered.

Supplies Needed

This is a lecture/demo class, and you will not have time to sew. Do bring a pencil and notebook for taking notes. You may also want a few extra pieces of plain paper for drawing.
